## Old School Revival

Published by [Cyril Huze](#) March 17th, 2009 in [Customs](#), [Editorial](#) and [Engines](#).

New bikes are inspired by the past, and a lot of new custom parts follow the same path... Retro simplicity for this new velocity stack whose body is spun aluminum (proof it's a new piece) with machined black anodized base and old school brass wire cover. The complete unit is 5" long and you choose the adapter corresponding to your carburetor (CV, S&S E or G, Mikuni 42 to 48 mm). Velocity stack \$199.00. Adaptor \$99.00. See your Custom Chrome Dealer or order online in the [Custom Chrome eStore](#) (delivery to the dealer of your choice).
