## Dick's Cool Unit velocity stack

Custom Design Studios makes an adapter to mount its Dick's Cool Unit velocity stack to EFI throttle-by-wire systems. Made of the finest materials, the adapter bolts directly onto a Mikuni Carburetor and can be attached to CV and S&S carburetors with a separate adapter. With the new adapter, motorcyclists can now attach Dick's Cool Unit to a wider variety of cycles as easily as changing an air filter.
